

HyDraw Library Manager 2018 SP1 (CAD)

Applicability:

HyDraw Library Manager 2018.0.0.2 R x64 EN

HyDraw Library Manager 2018.0.0.2 R x64 IT

Issues Addressed:

1. HyDraw Library Manager 2018 prompts to set library path, even after library files are installed at specified path.
2. Changing the Library path do not require to restart the application.
3. Unable to delete and rename custom library that is listed next to default Library set, provided by VEST.
4. Import from Excel not functioning. (after mapping the properties)
5. Linked Accessories from context menu are not listing with Components.
6. Linking Accessories to other Accessories is disabled.
7. Import Library:
 - a. Full Source Library path is not displayed.
 - b. Conversion from one unit to other not working correctly.
 - c. CAD Files, import results in error.
 - d. Some of the components, accessories selected do not get imported even though the status icon shown green.

Date of Release: Sep 22, 2017.
