

HyDraw V700 SP2

Applicability: HyDraw V700.0.0.6 R X64/X86 (with or without SP1)

Issues Addressed in SP2:

1. Sample Subsystem always gets inserted in color even though in options set to black.
2. Connection Lines first shows arrow at the tip and then removes it.
3. Display Dual Units - Not working on some cases.
4. Envelope is coming as solid line and Ellipse & Square External Ports are getting filled with black color.
5. Save As (Visio 2003-2010/Visio Document) preserves user defined settings.
Note: User Recommended to save the drawing in Visio 2003-2010 Format.
6. Cannot find Next & Cancel buttons on HyDraw Authorization Screen at 125% Text Size.
7. ERP Interface doesn't show actual properties.
8. Automatically find the library paths upon HyDraw and HLM Installation.
9. Export to MDTools gives "Object name not found" error, in case of duplicate port names.
10. Update Properties throws Unhandled Exception Errors in some cases.
11. Installing incorrect version of HyDraw V700 64bit on Visio 32bit or HyDraw V700 32bit on Visio 64bit prompts error while loading the add-in.

Issues Addressed in SP1:

1. Display Settings not associated with any Model Data property to a Component Type shows "0" in drawing along with the symbol.
2. Reassign Item ID struck for old Symbols.
3. Net List dialog is not working for secondary screen (display).
4. Rotate Display Properties - Port Name not included in list to rotate.
5. QuickManifolds - No Outline display for Flange.
6. Graphic User Interface (GUI) German Language Corrections.

Export to MDTools

7. With HyDraw Library 2012, Slip-in Symbols not having Port names, throws exception while running "Export to MDTools".
8. Port with Terminator exported as 'Pressure' type Port.

HyDraw Property Manager

9. "Select From Library", not showing Model Codes linked to Child Library.
10. Fetching data for Filter Element throws unhandled exception with some Libraries.

Date of Release: Dec 1, 2015.
