

MDTools 775 SP1 - Readme

Applicability: MDTools 775 with/without Hotfix 01/02/03 installed

Issues Resolved:

1. Inserting concentric undercuts on a SUN cavity displays an incorrect validation message.
2. Option to deactivate Automatic Update of Drawing not provided.
3. Using the Create Views command on an .iam (Assembly) file with the Display Center Mark option selected, throws an exception.
4. Edit Cavity allows duplicate Component IDs in the Virtual mode.
5. Shrink Wrap Assembly with engraving, throws an exception.
6. In a specific case, Component ID gets Cavity Name when using the Update Drawing command.
7. When a manifold has more than one angle hole, the Create Machining Drawing command throws an error.
8. Different-sized bolt holes assigned same bolt hole size by the Mirror Footprint command.
9. Editing a block after recreating balloons in a 2D drawing causes instability.
10. Auto Assemble throws an exception when a CAD model assigned to an Orifice Plug is missing.
11. Update Assembly command crashes Inventor while updating an assembly file in an Italian region.
12. Location of the O-ring groove's machining callout does not get stored when using the Update Drawing command.
13. The Machining chart does not update values, per set precision for Angle holes.
14. When inserting a cavity from HyDraw Schematic, engravings get offset.
15. Angle holes created using the Copy Multiple command are assigned incorrect nets by the Assign Net command.
16. When a manifold has an engraving sketch instead of an engraving text, the Create Machining Drawing command throws an error.

MDTools 775 Hotfix 03 - Readme

Applicability: MDTools 775

Addressed an additional issue with Flexera licensing TLS 1.0 to TLS 1.2 upgrade.

Date: Oct 3, 2019

MDTools 775 Hotfix 02 - Readme

Applicability: MDTools 775

Critical Security Update for Cloud License: Apply before Sep 10, 2019

MDTools to FlexNet Operations Cloud cryptographic protocol upgraded.

Transport Security Layer TLS 1.0 to TLS 1.2.

Date: Aug 27, 2019

MDTools 775 Hotfix 01 - Readme

Applicability : MDTools 775

Issues Resolved:

1. When using the Create Machining Drawing command, some machining sequence rows may get deleted on breaking into multiple sheets. (Part Environment)
- 2 Update Drawing command causes instability.
