

MDTools® 780 Hotfix 10

Applicability: MDTools 780 with SP2 and Hotfixes 07, 08, 09

Issues Resolved:

1. With a machining chart split among sheets, the complete chart was being added to the last sheet creating duplicates of the earlier items.
2. With a machining chart split among sheets and split by faces, the complete chart was being added to the last table creating duplicates of the earlier items.
3. Machining charts with meet list and quantity weren't updating after the second time changes were made in the part.
4. Machining charts inserted using ranges of items were creating duplicate chart entries upon update.
